An originally shaped bench with separate seats, preventing anyone for lying down. Effective and beautiful inside and out, the bench is valued for its design at home and abroad. The curved version allows you to create interesting formations while the separate seats can be fitted to walls or to a pole thus offering the possibility of unusual solutions for outdoor seating. Moreover, the variations with wooden lamellas boast a softer look and better comfort.

Awarded the prize “Excellent Design 2003”

Individual seats of heavy steel sheet are lightened by perforation and supported by a hot-dip galvanized supporting frame. A version with tropical wood lamellas painted with powder coating finish is also available.
